PROFESSIONAL SUMMARY

IT and Operations Professional with **12+ years of progressive experience** spanning information technology, systems administration, ICT training, operations management, customer service, data management, logistics and professional driving. Demonstrated career progression from **IT Assistant and Systems Administration roles to ICT departmental leadership and Trade Point Management**, with increasing responsibility across technology, people, operations and service delivery.

Currently serving as **Manager, Trade Point at Mr. Green Africa Limited**, coordinating trade point operations, customer service, logistics, route scheduling, dispatch, Odoo-based operational data management, staff training, reporting and workplace safety.

Experienced in **IT support, hardware and software troubleshooting, network administration, data entry and management, data backup and recovery, user training, operational reporting, route planning, customer relationship management and cross-functional coordination**.

Continuously developing practical digital solutions through **web and Android development projects**, including browser-based data-entry, data-validation and data-cleansing applications. Combines technical knowledge with operational experience to apply technology to practical business and service-delivery challenges.

CORE COMPETENCIES

- IT Support & Systems Administration
- Operations & Trade Point Management
- Data Entry & Data Management
- Data Validation & Data Cleansing
- Hardware & Software Troubleshooting
- Network Administration
- Logistics & Dispatch Coordination
- Route Planning & Navigation

- Customer Service & Relationship Management
- ICT Training & User Support
- Staff Training & Mentorship
- Reporting & Documentation
- Data Backup & Recovery
- Cybersecurity Fundamentals
- Process Improvement
- Team Coordination
- Cross-Functional Collaboration
- Professional Driving & Vehicle Safety

PROFESSIONAL EXPERIENCE

MR. GREEN AFRICA LIMITED — Nakuru County, Kenya

Manager, Trade Point

April 2022 – Present

- Manage day-to-day **trade point operations**, coordinating activities that support efficient service delivery, customer satisfaction and operational continuity.
- Coordinate **logistics, route scheduling and dispatch activities**, supporting timely movement of resources and field operations.
- Manage customer interactions, respond to operational issues and maintain professional customer service standards.
- Train personnel on **system operations, software usage and operational procedures**, supporting effective technology adoption.
- Perform **data entry, operational data management and backup activities using Odoo Systems**, supporting accurate and accessible business records.
- Prepare and present **weekly operational reports** to senior management, communicating operational performance and emerging issues.
- Coordinate activities across customer service, logistics and administration, supporting cross-functional collaboration.
- Implement and reinforce **workplace safety procedures** and responsible operational practices.
- Identify operational issues, coordinate corrective actions and follow up on implementation as part of continuous process improvement.

- Apply professional driving, route-navigation and logistics knowledge when supporting field and dispatch activities.

Key areas: Operations Management | Odoo | Data Management | Logistics | Dispatch | Customer Service | Staff Training | Reporting | Safety

Verified achievements:

- Managed **customer transactions on daily basis**.
- Coordinated timely **pickup of goods and dispatch routes**.
- Trained **120 staff members** on systems and operational procedures.
- Improved **customer support/client satisfaction** through **phone calls and online presentations**.
- Managed approximately **more than 500 daily operational records or transactions**.

PETANNS INSTITUTE OF BUSINESS STUDIES — Limuru, Kenya

Head of Department, ICT

January 2020 – March 2022

- Led the ICT department and coordinated day-to-day departmental activities supporting learning and technology operations.
- Supervised and supported ICT personnel while coordinating departmental responsibilities and priorities.
- Delivered training in **computer applications, networking and software management**, translating technical concepts into practical learning.
- Conducted **hardware troubleshooting, software maintenance, system updates and data recovery**.
- Guided students through practical ICT activities and real-world technology applications.
- Mentored learners and supported knowledge sharing within the department.
- Collaborated with other departments to resolve ICT-related issues and maintain smooth institutional operations.
- Supported a positive learning environment through communication, teamwork, mentorship and conflict resolution.

Key areas: ICT Leadership | Training | Mentorship | Troubleshooting | Networking | User Support | Collaboration

Achievements:

- Supervised **staffs during trainings and meetings**.

- Supported **students and novice users on system administration**.
- Maintained and serviced **computers and lab devices**.
- Delivered practical **training sessions/modules to students**.

WYERIA AND ASSOCIATES — Nairobi, Kenya

IT & Cyber Services Technician

November 2017 – December 2019

- Provided frontline **IT support**, including software installation, hardware configuration, troubleshooting and network-related support.
- Diagnosed and resolved technical problems for users, helping minimize disruption to daily operations.
- Installed and configured computer systems and software according to user and business requirements.
- Supported customers with internet and cyber-service requirements while contributing to service promotion and sales.
- Explained technical information to customers clearly and practically.
- Managed financial records, bookkeeping and ledger compilation, demonstrating accuracy and attention to detail.
- Balanced technical support, customer service and commercial responsibilities in a customer-facing environment.

Key areas: IT Support | Hardware | Software | Networking | Customer Service | Technical Troubleshooting | Sales | Financial Records

---

IRENE TECHNICAL TRAINING INSTITUTE — Samburu, Maralal, Kenya

January 2016 – August 2016

- Led ICT departmental activities and contributed to curriculum planning and departmental strategy.
- Delivered **System Support and Software Engineering training under the City & Guilds framework**.
- Provided practical training covering system support, software concepts and ICT applications.
- Conducted hardware and software troubleshooting and supported data-recovery activities.

- Coordinated interdepartmental meetings and faculty training.
- Developed learning materials and conducted student assessments.
- Supported students and staff in applying ICT knowledge to practical technology problems.

Key areas: ICT Leadership | System Support | Software Engineering | City & Guilds | Training | Data Recovery | Collaboration

---

EMBU LEVEL 5 HOSPITAL — Embu, Kenya

System Administrator

September 2014 – December 2014

- Installed and maintained network infrastructure and Pico stations supporting hospital ICT operations.
- Diagnosed and resolved hardware and software problems to support system availability.
- Conducted data entry and system backup activities.
- Provided technical support to users and assisted with day-to-day ICT operations.
- Worked in a healthcare environment requiring attention to system reliability, data accuracy and user support.

Key areas: System Administration | Networking | Healthcare ICT | Data Entry | Backup & Recovery | Troubleshooting

---

MWEIGA FARMERS' COOPERATIVE SOCIETY — Nyeri, Kenya

IT Assistant

September 2013 – December 2013

- Managed farmers' records and supported accurate **data entry and information management**.
- Assisted with inventory data management and record maintenance.
- Troubleshot network and computer-system faults.
- Assisted with software installation and system configuration.
- Provided day-to-day technical support to users.
- Worked with organizational records requiring accuracy, confidentiality and attention to detail.

Key areas: Data Management | Data Entry | IT Support | Networking | Inventory Records | Software Installation | User Support

---

CAREER PROGRESSION

IT Assistant → System Administrator → Head of ICT → IT & Cyber Services Technician → Head of ICT → Manager, Trade Point

Progressive growth in responsibility across **IT support, systems administration, ICT leadership, training, customer service, operations, data management and logistics coordination**.

SELECTED TECHNOLOGY PROJECTS

JasD DataHub — Data Validation & Data-Cleansing Platform

Browser-Based Data Management Project

Designed and developed a browser-based application focused on **data validation, data cleansing and quality-control workflows**.

- Generates flawed datasets for validation exercises.
- Defines correct final-state data.
- Evaluates submitted data against a structured validation rubric.
- Provides scoring and an audit trail for validation activities.
- Demonstrates practical application of data-entry, data-quality and data-cleansing concepts.
- Runs in the browser with client-side processing and local state management.

Technologies: HTML | CSS | JavaScript | Data Validation | Data Quality | Browser-Based Applications

---

CakeShop — Android Application

Android Development Project

Developed an Android-based cake ordering application supporting product browsing, cart management, ordering and payment-related workflows.

Technologies: Kotlin | Android | Jetpack Compose | Firebase | Firestore

---

JasD Digital Solutions — Web Development Project

Designed and developed a responsive digital-solutions platform focused on **website design, web development and WordPress solutions**.

Technologies: HTML | CSS | JavaScript | Responsive Web Design

TECHNICAL SKILLS

IT & Systems

IT Support | Systems Administration | Hardware Troubleshooting | Software Installation & Configuration | Network Administration | Computer Maintenance | Data Backup & Recovery | Cybersecurity Fundamentals

Data & Business Systems

Data Entry | Data Management | Data Validation | Data Cleansing | Records Management | Operational Reporting | Odoo Systems | Backup Management

Web & Application Development

HTML | CSS | JavaScript | PHP | Android Development | Kotlin | Jetpack Compose | Firebase | Firestore | Responsive Web Development

Operations & Logistics

Trade Point Operations | Logistics Coordination | Dispatch Coordination | Route Planning | Navigation | Customer Service | Process Coordination | Workplace Safety

Training & Leadership

ICT Training | Staff/User Training | Mentorship | Departmental Leadership | Curriculum Support | Knowledge Sharing | Cross-Functional Collaboration

---

EDUCATION

ST. PAUL'S UNIVERSITY

Bachelor of Business Information Technology (BBIT)
Ongoing

NYERI NATIONAL POLYTECHNIC

Diploma in Information Communication Technology
2013 – 2015
Modules I, II and III

CERTIFICATIONS & PROFESSIONAL TRAINING

- Defensive Driving & Vehicle Maintenance
- IT Security & Systems Auditing
- Data Backup & Recovery Best Practices

- Customer Service & Communication

ADDITIONAL PROFESSIONAL STRENGTHS

- Professional driving and route navigation
- Strong customer-facing communication
- Ability to translate technical concepts for non-technical users
- Cross-functional coordination
- Practical problem solving
- Technology adoption and user support
- Adaptability across technical and operational environments
- Safety-conscious approach to driving and workplace operations
- Continuous learning and technology development
